

Laser Hair Removal

Post-Procedure Instructions

1. Immediately following your treatment, the area may appear swollen and red. This is normal and should disappear quickly. You may apply aquaphor or hydrocortisone cream, if desired.
2. If the treated area is itching, you may apply Benadryl cream.
3. You may resume normal activities right away.
4. You may take Tylenol or Ibuprofen for discomfort. If the discomfort is so severe that it is not alleviated by Tylenol or Ibuprofen, please call Genesis MedSpa.
5. YOU MUST WEAR SUNSCREEN ON ANY TREATED AREAS THAT WILL BE EXPOSED TO THE SUN.
6. If you notice any blistering in the treated area, please call Genesis MedSpa.
7. Please do not pluck or wax any areas that you plan to have treated within 4 weeks of your appointment date. You may shave.
8. Please book your laser hair removal appointments 4 weeks apart for the face and 8 weeks apart for any area on the body for best results.
